

Trinity

An Evangelical Free Church

It is with pleasure and confidence that I recommend Granger Construction for your upcoming project.

Granger stepped into our IMPACT CENTER project, a 25,000 sq ft Gymnasium & Classroom Facility, midstream the planning phase. They brought great improvements to our plan and provided major cost saving alternatives. We have been thrilled with the outcome of the project and I would certainly suggest we use them for our next project.

After working with both Rob and Mike for two years in both the planning and construction phases, I count them as friends and men of integrity who live up to their commitments. They are clear communicators and the two of them provide a good balance of attention to detail and keeping the project moving ahead according to schedule.

As Pastor, I sometimes had concerns over traffic flow or cosmetic issues that I felt might impact future usage. Granger listened to and accommodated all my concerns. There were several plan additions that the Building Committee determined were needful as construction proceeded. Granger worked with us on these and implemented them effectively and at a reasonable additional cost.

It proved to be of great benefit to have a local contractor who knows all the area sub-contractor's strengths and weaknesses. He did an exceptional job of managing them and keeping them all on track. It also proved beneficial dealing with these same two men through the entire project. Their personal oversight of every step, from planning to dedication, minimized the communication gaps that often cause great frustration. They heard, planned, & delivered everything we talked about.

Our facility itself is a recommendation of their workmanship. After a year and a half of use & abuse everything has functioned flawlessly and our people are delighted. We welcome your inspection and I would be happy to answer any questions personally.

Sincerely,

Dave Strem
